

Update on Coil and Condenser Part Eligibility

The DTE HVAC Program is committed to ensuring high quality, energy efficient equipment is installed according to program requirements. However, there are market conditions which may impact contractors' ability to source eligible coil/condenser combinations.

Please contact DTEHVAC@icf.com if there are system match or AHRI certificate inquiries, prior to application submission.

An accommodation may be allowed if the following conditions are met

1. The condenser unit must be capable of performing above-baseline efficiency level (above SEER2 14.3).
2. Variance with the indoor coil must not lower performance of the condenser unit below program requirements.

The program will review SEER2 ratings for condenser models in the DOE's CCMS certification database and may apply the lowest SEER2 rating which most closely matches the cooling capacity of the coils.

Thank you for your continued support of the DTE HVAC Program! Please contact the account advocate team or your account manager for additional support.

Thank you,

Account Advocate Team
